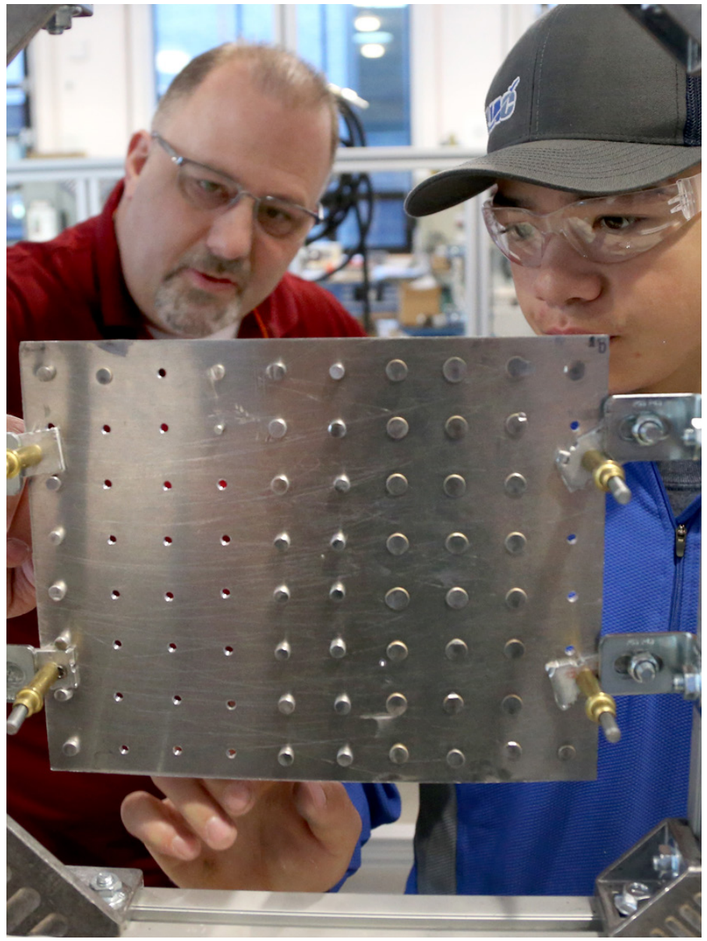
You have the experience. They have the talent and enthusiasm. How can you connect?

# partnering for success



## Career Connections

Our program links area professionals with students. Professionals like you help students learn the importance of teamwork, punctuality, workplace expectations and more. You can help them explore their interests and expose them to broader career options.

That way, as our students prepare to graduate, they'll be ready for workplace success.

**We offer courses in many career pathways:**

**Arts & Communication**

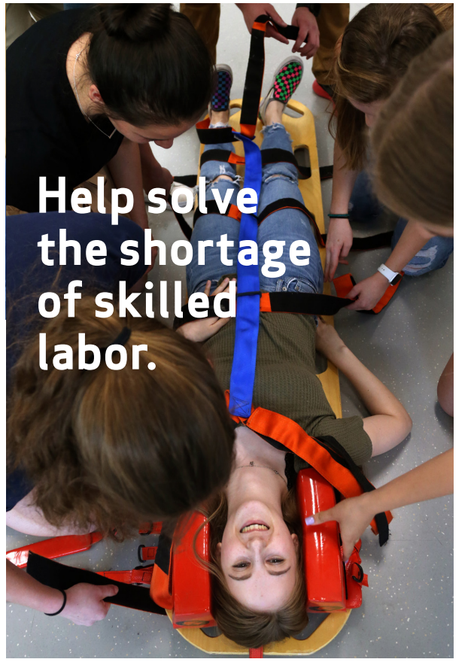
**Let's connect!**

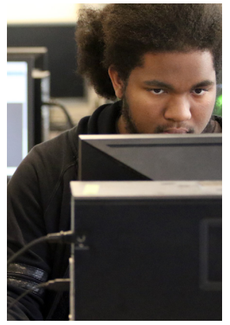
# matching talents, interests, careers

Join us in offering real-world learning and training opportunities that connect our students' passions to career pathways. Your partnership helps students gain enthusiasm for your industry and build work-ready skills your business needs.

Build enthusiasm for your industry.

Meet potential employees.





Help youth build work-ready skills your business needs.

Make a positive impact, prepare our future workforce.

## Innovative programs and spaces

We invest in our career and technical education (CTE) programs and classrooms. With community support, we've built cutting edge labs and flex spaces. Students learn with technology and equipment used in today's workplaces. We've shaped courses and curriculum with guidance from industry leaders. Students learn academic and leadership skills valued by employers and colleges, such as critical thinking, creativity and communication.

## Customized partnerships

We take a tailored approach to help you find the type of partnership that fits your organization, time and availability. You can:

- Speak to a class
- Attend career fairs
- Host job shadows
- Mentor
- Offer internships

Show students career possibilities and connect with your future workforce.

## We'll help you get started!

Get a one-on-one consultation with our career and pathways internship coordinator. She'll find the opportunity that's right for you.
