

COMMUNITY RELATIONS

Contacts with Students

The Board recognizes that nonprofit organizations may want to distribute materials in the School District.

It shall be the School District's policy to distribute informational materials from nonprofit organizations when they have educational, recreational, or social value for students.

Any nonprofit organization wishing to distribute informational materials must first submit, to the superintendent or a designee, a copy of the material. Materials must meet certain criteria prior to distribution and may require approval by the building principal.

As requests from nonprofit organizations are received, approved materials will be made available to the appropriate buildings.
