

MANAGEMENT SUPPORT SERVICES

Food and Beverage Consumption

The Board recognizes that staff members and others associated with the District are normally expected to pay for their own refreshments and meals. However, under certain circumstances (such as meetings, workshops, and recognition activities), when the District is deriving benefit, the District may expend funds for food and nonalcoholic beverages consumed by staff and others while conducting District business.

The superintendent is directed to establish procedures, which reflect the intent of the Board to provide for reasonable food and beverage consumption while in the conduct of business that is of benefit to the District.
